

WC50 DoSys Water Chiller

Chills up to 50 gallons of water
per hour
Speed 3 - 5 gallons/minute
Temp. 33-34 °F

The unique technology in a Do-Sys
equipment will take your baking
quality to an even higher level.

Revent[™]
More than Quality.

Standard features

The new DO-SYS Water Chiller is based on the age-old cooling principle: ICE. It is now possible with a small size unit to produce large quantities, even up to 50 gallons in one hour.

For the optimal use of this chiller we recommend the DO-SYS Water Meter WM 1000

Specifications	WC 50
Capacity	50 gallons/hour
Water pressure	15 - 100 psi
Maximum test pressure	225 psi
Water inlet diameter	NPT 1/2" o min
Speed (depending on water pressure)	3 - 5 gallons/min
Temperature	33 - 34 °F
Electrical requirements	110 Volts
Power	10 A
Nett weight	127 Lbs*
Dimensions (w x h x d) (without joining appliances)	19.9" x 34.6" x 20.7"

How it works:

First, the WC 50 will make a block of ice that weighs approx. 125 lbs. In the middle of this huge ice cube is an ice water bath of approx. 8 gallons. Tap water is chilled in a specially shaped cooling spiral located in this ice water bath. The tap water is forced around the spiral at a high speed causing a fast chilling process. The ice is what allows for the high cooling capacity. One pound of ice actually has a capacity 70 times greater than water for storing cold calories.

Despite the relatively small size of the WC 50, the large block of ice enables it to chill a high volume of water over a period of 6-7 hours. No pump or similar device is needed as this unit operates at normal water pressures. The closed circuit system guarantees a totally hygienic system.

***Final shipping**

Weights will depend on the final order specifications.

A model with a higher capacity is available.

Continuous product development is a Revent policy. Therefore, we reserve the right to change specifications and/or design without prior notice. Pictures or drawings may include product options.
